

Learning for a Sustainable Future & 3M Canada Company
invite elementary schools to participate in...

EcoLeague™

Using Inquiry Learning to Build Community

- › challenge and motivate students to engage in inspiring and rewarding community and school-based sustainability action projects through inquiry learning
- › learn to meet curriculum expectations through highly engaging and sustainability-focused learning strategies that transform learning and develop citizenship, including those from [Connecting the Dots](#)
- › develop strategies to link education to your local neighbourhood by engaging community partners.

Youth Forum

October 25, 2016
3M Milton Sales Centre
2751 Peddie Road
Milton, ON

- › Action Teams [one teacher; one parent/administrator/custodian; and four students from grades 5-8] from each elementary school
- › Students attend workshops about action projects they can undertake in their school and community
- › Teachers learn how to use inquiry to engage their students in action projects linked to the curriculum
- › Refreshments and lunch will be served
