

SUMMER INSTITUTEs

Using Film-making to Enhance Authentic Inquiry and Project-based Learning

George Brown College

July 31 - August 2, 2017
9am-4pm daily

\$50 per person (refundable upon completion)

Includes breakfast, lunch, refreshments, & 2 publications (2 nights accommodation if requested)

Space is limited! Registration on the OTF site opens on June 1. Pre-register with LSF at www.lsf-lst.ca/institutes

Who should attend?

Grade 6 to 10 Educators of all subjects who wish to:

- explore how to incorporate video production as a means of applying the strategies of inquiry and project-based learning, using the Water Docs @ School Action Projects Program as an example
- explore how to incorporate video production as a context that brings inquiry and project-based learning for their students

Receive copies of:

- *Connecting the Dots*
- *Water Docs@ School*

"The students loved the freedom of being able to pick a topic they were passionate about, to research the topic and collect data and then to have their creative freedom. There was a huge facet of opportunities for students with different learning needs." (See the full interview @ <http://bit.ly/28M7wZE>)

- **Lindsay Butson, Grade 8 teacher**

Focus

- Film-making is an excellent vehicle to bring authentic inquiry and project-based learning together, empowering students to positively impact their communities and share their learning.
- In this workshop, we delve into all aspects of managing a learning process that engages students in research, community action, and film-making
- Film-making techniques using phones and hand-held devices will be shared. No experience with film-making is required.
- A professional inquiry methodology will shape the learning and draw on the experiences of those present.
- Experiences and films from the **Water Docs @ School Program** will be showcased
- **Water Docs @ School Program** is an 8-month learning and action program for Ontario Grade 7/8 students, delivered through a partnership between Ecologos and Learning for a Sustainable Future

Delivered in collaboration with:
