

Feelings towards Climate Change

82% of Canadians

feel that people have failed to care for the planet

Three quarters

are concerned about the impacts of climate change

Half believe climate change is causing mental health issues or making them worse

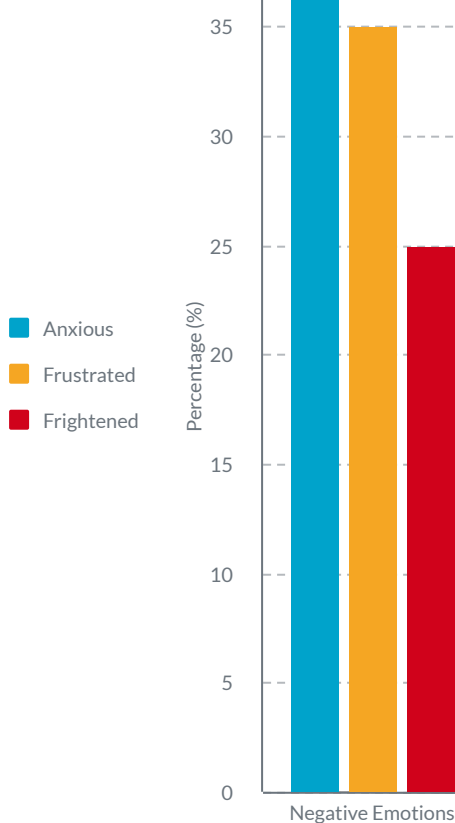

A quarter of educators, parents, and students indicate that their worries about climate change are affecting their daily life

When respondents think about climate change the emotions they expressed most commonly were

feeling anxious (37%), feeling frustrated (35%) and feeling frightened (25%)

Students are more likely than any other respondent group to report **feeling anxious (41%) and frightened (31%)**

According to Ecoanalytics Ladder of Engagement, students are increasingly empowered meaning **they believe human-caused climate change is happening AND they believe there are things we can do to change it (39% in 2022 up from 28% in 2019)**
